**ANYA PROSVETOVA**

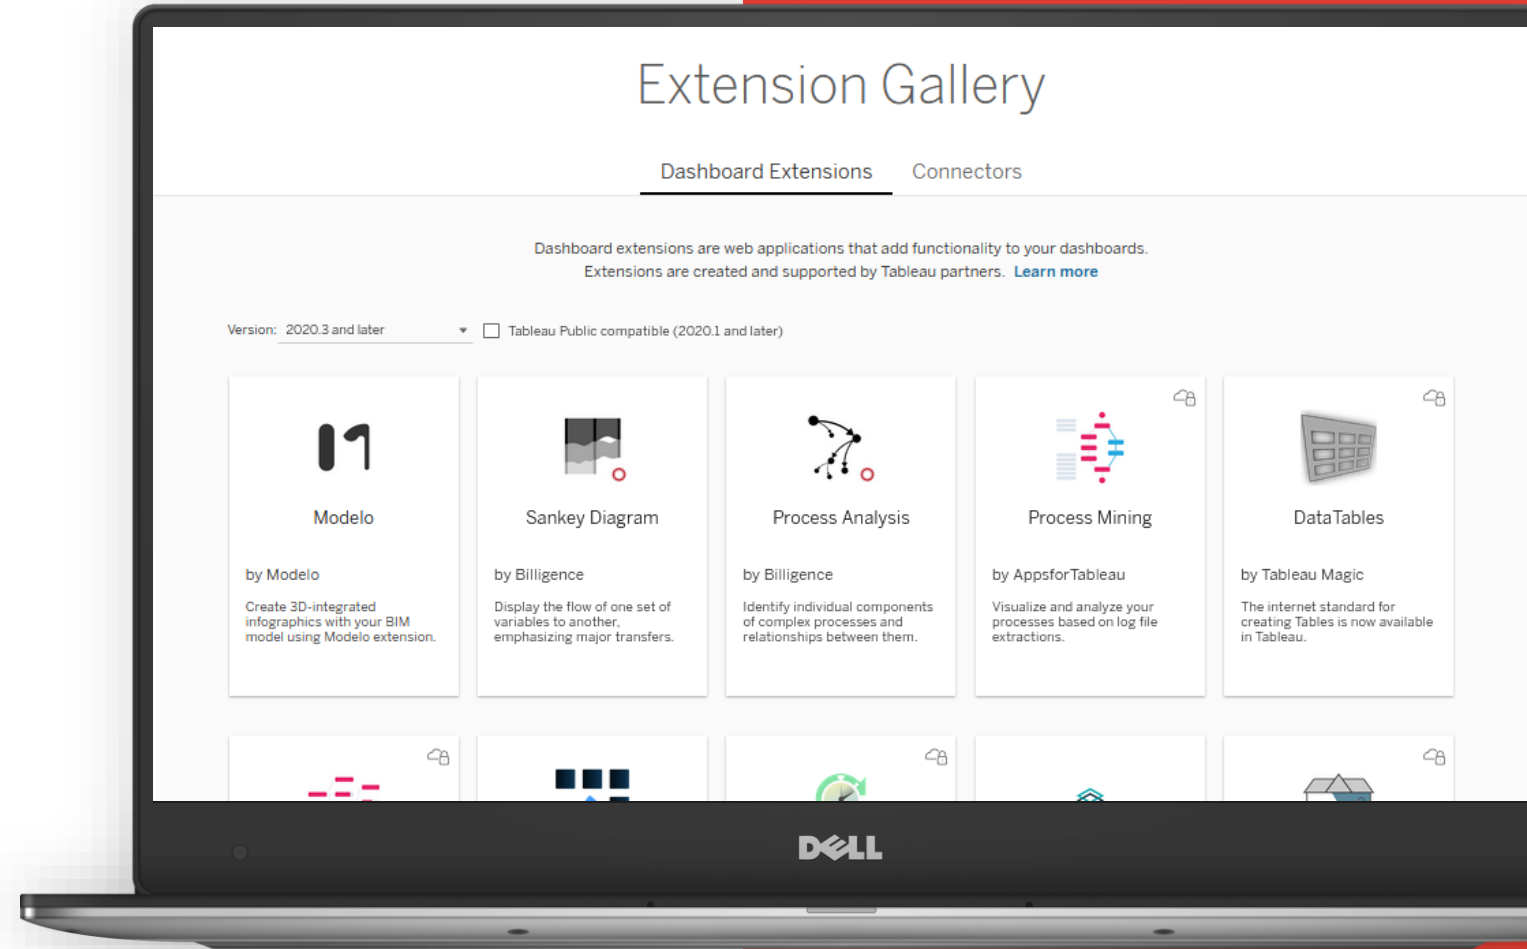

Tableau DataDev Ambassador and  
Data Analytics Consultant at The  
Information Lab UK

# 1. What is a Tableau dashboard extension?

## 2. Where can I find a dashboard extension?

extensiongallery.tableau.com

### 3. How can I **use** an extension on a Tableau dashboard?

## 4. Can I create my own dashboard extension?

### JavaScript file

The JavaScript file (or files) that contains your extension's logic. This script is referenced in the HTML file.

```
JS script.js ×
JS script.js > updateFilterRange
1  tableau.extensions.initializeAsync().then(() => {
2    // console.log('I have been initialized!!')
3    let dashboard = tableau.extensions.dashboardContent.dashboard;
4    let selectedWorksheet = dashboard.worksheets.find(w => w.name === 'Historical Trend');
5    let fieldName = 'Date';
6    updateFilterRange(selectedWorksheet, fieldName);
7  });
8
9  function updateFilterRange(worksheet, fieldName) {
10   let today = new Date();
11   let lastYear = new Date();
12   lastYear.setFullYear(today.getFullYear()-1);
13   worksheet.applyRangeFilterAsync(fieldName, { min: lastYear, max: today});
14 }
```

## 4. Can I create my own dashboard extension?

### Web page

A webpage that uses a Tableau-supported JavaScript library. The web app consists of one or more HTML files. You host this page on a web server (the server specified in the .trex manifest file).

```
<> index.html X
<> index.html > ...
1  <!DOCTYPE html>
2  <html lang="en">
3  <script src="https://cdn.jsdelivr.net/gh/tableau/extensions-api/lib/tableau.extensions.1.latest.js"></script>
4  <head>
5    <title>Date range extension</title>
6    <meta charset="utf-8">
7    <meta http-equiv="X-UA-Compatible" content="IE=edge">
8    <meta name="viewport" content="width=device-width, initial-scale=1">
9
10   <!-- import the webpage's stylesheet -->
11   <link rel="stylesheet" href="/style.css">
12
13   <!-- import the webpage's javascript file -->
14   <script src="/script.js" defer></script>
15 </head>
16 <body>
17   <p>This extension updates the date filter to view YTD transactions.</p>
18 </body>
19 </html>
20
```

## 4. Can I create my own dashboard extension?

```
DateFilterExtension.trex X
DateFilterExtension.trex
1  <?xml version="1.0" encoding="utf-8"?>
2  <manifest manifest-version="0.1" xmlns="http://www.tableau.com/xml/extension_manifest">
3    <dashboard-extension id="com.tableau.extensions.myawesomeextension" extension-version="0.7.0">
4      <default-locale>Extension to update dates</default-locale>
5      <name resource-id="name"/>
6      <description>Extension to update dates</description>
7      <author name="Anya Prosvetova" email="email@email.com" organization="The Information Lab UK" website="https://www.prosvetova.com"/>
8      <min-api-version>0.9</min-api-version>
9      <source-location>
10     <url>https://spiritual-fair-wrench.glitch.me/</url>
11   </source-location>
12   <icon></icon>
13 </dashboard-extension>
14 <resources>
15   <resource id="name">
16     <text locale="en_US">This extension updates a date filter to a specific range</text>
17   </resource>
18 </resources>
19 </manifest>
```

### Manifest file .trex

The manifest file **.trex** is an XML file that describes the extension and provides information to register the extension with Tableau. It references Tableau's Extension API library.

## 5. Where can I **learn more** about dashboard extensions?

**Watch** tutorials by Tableau DataDevs and the community

Search for 'Tableau datadev' on YouTube

**Read** Tableau Dashboard Extensions API documentation

[tableau.github.io/extensions-api](https://tableau.github.io/extensions-api)

**Join** Tableau Developer Programme
